

JB SERIES

Folder Stacker

Folder and Stacker

Quality finishing equipment for high efficiency operation

Designed with the operator in mind, JB Industries Inc. finishing equipment offers high quality construction and a simple design for easy maintenance.

Sheet Folder with Stacker

Folder / Cross Folder

- 1, 2, or 4 lane configurations
- Compact size
- Inverter driven
- Static bar
- 2 primary folds
- 3 cross folds
- Self diagnostics
- Safety controls
- Bypass all folds
- Self centering cross fold plate

Simple Service

Service is easier due to use of common components and simple design.

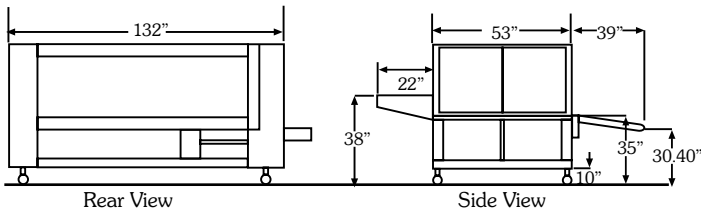

Powerful Control

Our simple, yet powerful control is fully programmable and includes built in diagnostics for easy troubleshooting and repair. Programming is easy with perfect results time after time.

Simple Design

The machine is constructed from heavy gauge steel using only the finest materials and components. Fewer parts means less breakdowns and easier service.

Sheet Stacker

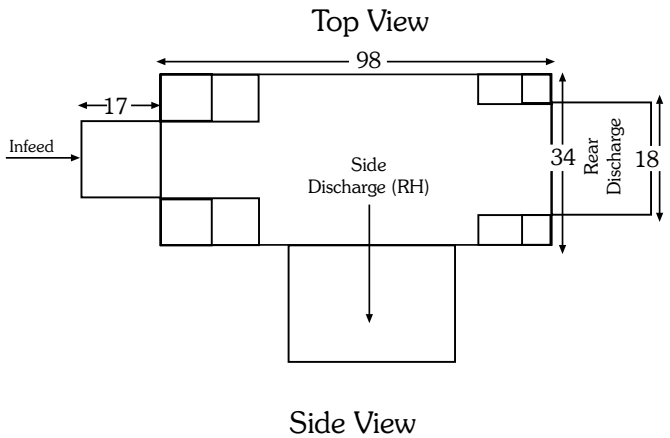

The labor saving JB Stacker is a large piece stacker and conveyor controlled by the JB Folder. The unit consists of two parts: The stacker, which creates stacks of items, and the conveyor, which relocates the items to a configurable discharge.

- Belt Drive
- Easy access for maintenance
- Preset counter
- Full bypass
- Electronic measuring
